FOOTBALL.

A Red Hot Game Will Be Played Here On Christmas Day.

A red hot game of football will be played at the park on Christmas day at 3 o'clock p. m., between Danville and Wrightsville.

The admission will be ten cents for men; ladies free.

Some of the best football material in the state will be on the two teams. It is expected that Mayor Z. V. Taylor will referee the game.

Two good elevens and substitutes will be picked from the following, who are requested to go in training at once:

DANVILLE

Daniel, Pearce, Logan, Sergeant, Dr. Turner, McIver, Kirkpatrick, Douglas, Avery, Horrey, Wheeler, Mendenhall, Causey, Ridge, McNairy, W. Reynolds, Andrews, Rees.

WRIGHTSVILLE.

Wright, Cunningham, Wharton, H. Reynolds, Boycott, J. Cone, Patterson, Coffin, Vanstory, Love, Lewis, Ingram, Matthews, Rankin, R. Turner, Boone, Schenck.

CAUSE OF THE TYPHOID.

Dr Lewis' Opinion on the Normal College Sickness.

WELL WATER CONTAMINATED.

Sewerage System Also Defective. Experts Say Dr. McIver Is Entirely Blameless.

The recent outbreak of fever at the Normal and Industrial College at Greensboro has excited in the hearts of the people of the whole state the deepest sympathy and concern. The greatest interest in the origin of the epidemic is naturally and properly felt by all. Rumors have been started having no basis in fact. To correct any misapprehensions and for the information of the people of the state, the board of directors, at a meeting held at the college on November 30th, requested me, as secretary of the state board of health, to prepare and give to the press an official statement of the facts as ascertained to date. I was instructed to be perfectly frank, concealing nothing. If, therefore, anything of importance should happen to be omitted from this statement the reader may rest assured that it was not intentional, but the result of a poor memory or the hurry that very busy men cannot always escape.

Learning Friday night (Nov. 24th) that the board of directors of the college would meet on Monday, and knowing that the committee of the board of health would make an investigation early in the week would not be able to get in their formal report in time, I felt it my duty, as the executive member of the board of health, to make a personal investigation and be prepared, as far as possible, to enlighten and advise the directors if desired by them.

Accordingly I repaired to Greensboro early Saturday morning, and remained there until Tuesday morning, spending the whole time from breakfast to bedtime, except Sunday morning, at the college.

After talking over the whole matter with President McIver, my first inquiry was

"The nature of the fever."—Requesting an interview with the physician in charge, it was promptly accorded, and I had a very full and satisfactory conference with Dr. Gove, the resident physician, and Dr. W. R. Beall, the chief consultant, which convinced me beyond doubt that the first cases, about sixty of the total number of one hundred cases, beginning about October 25th, were malarial in character. For the benefit of the medical reader, I will state that this conclusion was based upon the description of the attack given by the doctors, the presence of the pladosium malariae in the blood, of all the eight cases whose blood was examined microscopically. (I verified this by a personal examination of two specimens that had been kept) and recovery is from four to ten days under quinine. The remaining forty cases, in round numbers, were clearly typhoid fever. Of this number about ten seemed to have been the subjects of a double infection, with both malaria and typhoid, and the remainder uncomplicated typhoid, typical in character. I was also informed that the sickness was strictly limited to students who ate and slept in the college.

Having satisfied myself as to the nature of the sickness, my next step was to ascertain if possible the cause or causes of both. We will first consider

The malarial fevers.—The only thing about the premises I could find at all likely to produce malaria was a narrow marshy vally, carrying a very small, sluggish stream, so small as to be scarcely perceptible in places, immediately in the rear of buildings composed of the president's house, the wooden dormitory, the infirmary and the horse stable. Upon inquiry I also learned that mosquitoes had been very abundant.

But in this connection it should be said that the malarial diseases have been unusually prevalent this season in the hill country of the state. The reports from the county superintendents of health for September, published in the monthly bulletin of the state board of health for October, showed malarial fever present "in all parts of Alamance, Cabarrus, Caswell, Davidson, Guilford, Mecklenburg and Rowan. It is fair, therefore, to assume that some of the students brought the malaria with them from home, but others, perhaps many, were unquestionally infected at Greensboro, as at least two girls from the mountains had malarial fever. It should not be forgotten that this has been an exceptional year for malaria in the middle section of the state, and not likely to be repeated in the near future certainly.

The typhoid fever—it's cause.—Typhoid fever is essentially a filth disease, the germ of which is known as bacillus typhocus, a metile, water borh bacterium, which once introduced into water of milk or moist filth reproduces itself with fearful rapidity by fission or splitting in half. The media of transmission of this germ are in the order of their importance, water, milk, insects (flies) and air (?) While many high authorities, chiefly English, believe in aerial transmission, the weight of opinion is against it. But all agree that in an immense majority of the cases it is conveyed by contaminated water, or milk infected by such water used in adulterating it, or in washing the cans or the udder of the cow, or by the hands of a not over-cleanly milker, who either has a walking case of the disease himself, or has infected his hands in nursing a case.

Bearing these principles in mind, I made a personal inspection of the premises, but found nothing that had not already been discovered by the indefatigable president and his assistants. I will give my observations in the inverse order of their importance.

The Grounds.—Nothing was found that in any way, in my judgement, could have been in the least instrumental in causing typhoid fever.

The dairy, cow barn, horse stables and pig pens were all in good condition. The last named was too far away to have had any effect even if its condition had been bad.

The Sewerage and Plumbing—When the first dormitory (brick) was built in 1892, a sewer pipe was laid, with which was connected one water closet, which was kept locked and only used in case of sickness; the bath tubs, the wash pipe from the kitchen sink and five downspouts from the roof. In 1895 a new system of sewers was put in and the old sewer abandoned, as was supposed, except as a drainage pipe for the roof water; but it turns out that the plumbers, when making a connection for the new sink of the kitchen made it with this, thinking it was the new sewer, which was the same size, eight inches. When taken up (as has been done, the trench being disinfected,) this old sewer while very offensive to the nose from the decaying animal and vegetable matter from the kitchen sink, like the old fashioned dunghill at the back window of many a country kitchen, was said to have been tight and well scoured. It showed, however, one defect which should be mentioned in this discussion, namely, a small opening at the top, due to a bad joint in the space under the butler's pantry adjacent to the butter room.

The new sewers, as far as examined, were in good condition, except the stoppage of one near the president's house, about a hundred yards below the Teague house, by the roots of a tree, an accident which is said to be practically unaviodable. This had been remedied at the time of my visit.

The Plumbing:—While mended plaster and stains on the wall under lavatories and bath tubs in some instances indicated defective work at first, these defects have been remedied, and I should say that the interior plumbing was good. I regret to say that the same cannot be said of all the external plumbing, by which is meant the connections between the house fixtures and the sewer, for one notable exception was found in a leaking soil pipe connecting ten waterclosets on the second floor of the main or brick dormitory with the main sewer. This pipe was not leaking at the time of my visit, for it has been torn out and replaced as soon as the leak was found, but all agree that it was leaking when examined—on the 18th, if I mistake not—and that the adjacent soil was wet. This pipe was 17 feet long, the first five feet from the down pipe being iron, and the remaining twelve of six joints of terra cotta, which later section, beginning not quite a foot under the surface of the ground, rapidly descended to the man sewer at a depth of four feet. It ran under the butler's pantry or serving room of the dining room, the floor of which is about 2½ feet above the ground, parallel to and eighteen inches distant from one wall of a closet under the steps leading from the dormitory above, in which closet, for the lack of any other approximately cool place, the butter was kept—only, however, for a few days at most, after being received from the dairies before being consumed, the cakes of butter, with very rare exceptions, being wrapped in impervious parchment or paraffin paper. In the wall of the butter closet adjacent to the soil pipe an opening 20 by 42 inches, the bottom being on the floor which was practically on a level with the ground had been cut for ventilation. Opposite this opening and in a line across the leaking soil pipe saturated earth, and about twenty feet distant was the only opening in the foundation wall of that section of the building.

In this discussion of the sewerage, I wish to acknowledge my indebtedness to Col. A. W. Shaffer, the sanitary engineer of the board of health, and to Mr. J. L. Ludlow, C. E., of Winston, an ex-engineer of the board and now so well and favorably known in that capacity throughout our state and other southern states, who was employed by the college to make an inspection.

Flies:—Flies convey the germ by walking over the bowel discharges of a typhoid fever case and carrying them on their feet to food in the kitchen or dining room I made careful inquiry at to the occurrence of typhoid in the neighborhood of the college. I could learn only of one case, in the person of the night watchman, who was sick in August I sent for and questioned him as to the disposal of his dejections and was informed that they were invariably placed in a hole dug in his garden, disinfected and covered up with earth. Flies did not frequent the sewerage-wet earth, around the leaking soil pipe because it was too dark for them. The fly must be excluded in this instance as a cause. In passing I shou'd say that there was no possibility of the contamination of the drinking water by this patient.

The Milk:—There was no reason to suspect the milk, all of which was obtained from the college dairy, and the fact that only fourteen of thirty-eight patients drank milk when well, and the further fact that not a single case of sickness occurred in four families who bought milk from the college negatives

[CONTINUED ON THIRD PAGE.]

THE PRESIDENT'S MESSAGE.

One of the Most Interesting in Many Years.

THE PHILIPPINE QUESTION

Is the Principal Topic of Discussion. "The Rebellion Must be Put Down."

By Wire To THE TELEGRAM.

Washington, Dec. 5—The president transmitted his message to congress today. It was read by both houses and referred.

The message, in substance, is as follows:

"At the Executive Mansion,
"December 5, 1899.

"To the Senate and the House of Representatives:—Upon the threshold of your deliberations you are called upon to mourn with your countrymen the death of Vice-President Hobart. His great soul rests in eternal peace. His private life was pure and elevating and his public career distinguished by integrity and exalted motives.

"The condition of the country is one of unusual prosperity. There is good will among the people and relations of friendship with every government of the world. Foreign commerce has greatly increased and the volume of the value of imports and exports is the largest ever before in a single year. The secretary of the treasury estimates the surplus for the present year at $40,000,000. Conditions of confidence have brought gold into more general use and custom receipts are now almost entirely in gold."

The president recommends that additional power be conferred upon the secretary of the treasury to sell United States bonds and to employ other means necessary to maintain the parity between gold and silver. The authority should include power to sell long or short bonds. The former recommendation is renewed that a portion of the gold holdings be placed in a trust fund for which greenbacks be redeemed upon presentation. When redeemed not thereafter paid out except for gold.

The combinations of trusts, which are justly provoking public discussion, should claim the early attention of congress. It is universally conceded that combinations controlling commodities necessary to the general community, suppress competition whereby prices are enhanced to the general consumer. They are obnoxious to the common law and also to the public welfare. There must be a remedy for such evil. If the present law can be extended to control and check such trusts, it should be done without delay. State legislation, to which Cleveland looked for relief from the evils of the trusts failed to accomplish the objects, which was due to divergent views of the states. Uniformity of state legislation is desired.

The president extendedly reviews the relations with foreign governments. The contract with the Maritime Canal Company, of Nicaragua, is declared forfeited by the Nicaraguan government on the ground of non-fulfilment of the ten years' term stipulated in the contract. The company has lodged a protest against the action, which appears worthy of consideration. It is expected that Nicaragua will afford a fair hearing of the merits of the case. The great importance of the Nicaragua canal cannot be too strongly impressed upon congress. Reasons for early action are stronger than ever.

Our interests in China are not neglected. Trade with China continues to grow. The recommendation of the commission to study the commercial and industrial conditions of the empire is repeated.

Relations with Germany are cordial. The government of the empire seems reluctant to admit the excellence of our food production. Our system of control of exported food staples invites examination from any quarter and challenges respect for its efficient thoroughness.

The last message referred to pending negotiations with Great Britain with respect to the Dominion of Canada. By means of executive agreement a joint high commission had been created for the purpose of adjusting unsettled questions existing between the United States and Canada. Much progress by the commission toward the adjustment of many of these questions was made when it became apparent that irreconcilable difference of views respecting delineation of the Alaskan boundary existed. The question received the careful consideration which its importance demands.

This government has maintained an attitude of neutrality in the trouble between Great Britain and the Boers. Had the circumstance warranted our good offices would have gladly been tendered.

For the fourth time in the present decade the question has arisen with Italy regarding the lynching of Italian subjects. The chief executive is able to state that a fair and satisfactory solution will be reached. A bill to provide for punishment of the violation of treaty rights by aliens is also reported favorably to the senate. It is earnestly recommended that the subject be taken up anew and acted upon at the present session.

Mr. McKinley renews the recommendation for the establishment of a cable to Manila, and suggests that in case congress should not take measures to effect this by direct action of the government, the postmaster general should be authorized to invite competitive bids for the establishment of the cable.

The message last year devoted a great part to a consideration of the Spanish war, the results it wrought and conditions imposed for the future. Evacuation of Porto Rico has already been accomplished and nothing remains necessary but to continue provisional control until congress enacts a suitable government. This nation has assumed before the world a grave responsibility for the future good government of Cuba. The accepted trust and our mission to accomplish it can not be fulfilled by turning adrift commonwealth in the face of vicissitudes which often attend weaker states. The greatest blessing which can come to Cuba is the restoration of her agricultural and industrial prosperity. Negotiations are about to be made defining the conventional relations with Cuba and Porto Rico. The message recommends legislation to carry out the articles of the treaty of peace with Spain by which the United States is assured payment of cost in claims of indemnity to its citizens against Spain.

The situation of American citizens in Turkey remains unsatisfactory. Congress should use its earnest effort to secure fair treatment to our citizens abroad, and not hesitate to apply whatever corrective may be provided by the statutes.

The message recommends that the senate ratify the convention for the pacific settlement of international conflicts.

Congress is recommended to provide special medals for volunteers, regulars, sailors and marines on duty in the Philippines who voluntarily remain after their terms of enlistment have expired. The message also recommends that congress provide for chaplains in the Philippines.

The placing of the postal service on a self-sustaing basis in Cuba, Porto Rico and the Philippines is recommended by the president.

The navy maintains its spirit and high efficiency, and the message justifies liberal appropriations. Congress should make necessary provision for vessels now under contract and building. "I believed the transfer of sovereignty in the Philippines accorded with the wishes of the mass of the Filipinos. From the earliest moment they were assured of our desire for their welfare. A most unhappy condition of affairs confronted our commissioners upon their arrival at Manila. They hoped with Dewey and Otis to establish peace. The course recommended by the commission has been pursued. The rebellion must be put down. A notable beginning has been made in the establishment of a government in the Island of Negros, which is deserving of special consideration. This was the first island to accept American sovereignty. The American flag should be used in the archipelago. Piracy should be suppressed. The Sultan of Sulu will co-operate with us. The United States will not occupy any island in the Sulu group without the consent of the sultan. The future government of the Philippines rests with congress. Graver responsibilities were never before confided to the United States. The islands are ours by every title in law and equity. They cannot be abandoned. Such would involve a cruel breach of faith and would place the peaceable majority at the mercy of the armed insurgents. It does not seem desirable that I should recommend a form of government for the islands until congress expresses it's will, when I will use the authority vested in me by the constitution."

The message recommends erecting the Hawaiian Islands into judicial districts, and that a government be provided for them.

A more complete form of territory organization in Alaska and Porto Rico is recommended in the message.

The president recommends a memorial bridge over the Potomac at the Arlington estate. "The 14th of December is the one hundredth anniversary of the death of Washington. I am glad to learn that in many parts of the country the people will observe the anniversary. Never has this nation had more abundant cause for thankfulness to God for manifold blessings, for which we make reverent acknowledgement.

"(Signed) William McKinley."

M. E Church Burned.

Winston, Dec. 4—Love's Methodist Episcopal church at Walkertown was destroyed by fire yesterday. It caught in the ceiling from a defective flue and burned rapidly. The organ and carpet were saved.

No insurance. The house cost two thousand dollars. Rev. W. M. Curtis is pastor.

Notice!

You will please call and pay your city taxes, as the city is in pressing need of the money. R. M. Rees,
Dec. 4, 1899. City Collector.

"Dear! dear!" exclaimed the perplexed hostess. "I've got a whole roomful of guests who don't seem inclined to notice each other. Can't you suggest something to start a general conversation?" "Yes," responded the cynical friend, "Get somebody to sing."

TUESDAY, DEC. 5, 1899.

THE NORMAL SICKNESS.

We surrender a good deal of space today to the report of Dr. R. H. Lewis, secretary of the state board of health, and statements from others in regard to the situation at the State Normal and Industrial College. We do this that people may read for themselves what the investigators say.

All people will rejoice that the cause of the outbreak of the fearful epidemic has at last been discovered. The drinking water from two wells was found to be infected and they will be promptly filled up. This, physicians say, will remove all danger, and there need be no fear of further trouble. The broken or defective sewer pipe, about which so much has been said, seems to be laid aside, and the infected drinking water, which is in harmony with the generally accepted fact that typhoid germs can only be taken into the system through the medium of food or drink, will stand as the cause of the fever.

Had the sewer-pipe theory been accepted it would have been proper to ask from whence came the germs which infected the sewer. And had it been established as a fact that the disease was contracted from sewer gas the findings of our ablest physicians, after years of careful investigation, would have been knocked to pieces.

But the matter has been determined along the lines of fact established by scientific research, and now when the pest holes are filled up and the premises thoroughly disinfected, the great work of the college, which has suffered such an unfortunate disaster, will be ready to proceed and there will be no danger from such procedure.

Dr. Lewis closes his report with the following timely admonition: "Guard with jealous care the purity of your drinking water." The sad experience of the Normal should be an object lesson to all people to heed Dr. Lewis' injunction.

In a brief comment upon the reports the Charlotte Observer says:

The reports of Dr. A. Anderson, bacteriologist of the state board of health, and of Dr. R. H. Lewis, secretary of the same body, place the responsibility for the recent outbreak of sickness at the normal school at Greenboro upon two wells on the premises. The idea of aerial transmission of typhoid fever germs is rejected and the broken sewer pipe under the main building is acquitted. This belittles the idea that sewer gas is an agency very dangerous to health We have no comment to make upon it all because we don't know.

The great Modder River fight, where blood flowed like the waters of the stream and death sat on its reedy banks, again reminds proud England of the mighty burden she has taken up in subverting the Transvaal. The Boers are not fighting for lucre—it is doubtful whether they are paid more than a daily allowance of powder and ball and two lunches of hardtack. Their homes and the comfort of those who keep the hearth warm while they are away at work in the fields—this is the stake. When men shoulder arms for such principle, they are to be feared. No wonder the Highlanders shrank appalled from the storm of bullets at Modder River. How mighty soever her equipment, how numberless soever her warriors, we venture to remark that Britain will learn before the Boers stack arms and hold their necks for the yoke, that the demon that raged at Modder River will break loose on many a bloody field, teaching imperious England that though the right may fall with such overwhelming odds against it as herself has arrayed against the little South African republics, the principle will be in gory evidence before yielding.

The following very complimentary notice concerning a former citizen of Greensboro, we take from the New York Financial Review:

We note in the report of the commissioner of agriculture for Virginia, not yet issued but a draft of which is at hand, a number of excellent recommendations which will prove at once interesting and useful to those who take a proper account of the document. He rightly speaks of the advantages of his state from an agricultural point of view, and he believes that a much greater future awaits Virginia. The full report will be admirably illustrated. Commissioner George W. Koiner is one of the most efficient men his department has known, for not alone is he familiar with the work set before him, but he has devoted himself to his work with a full realization of how much good such a department as his can accomplish.

Congressman W. W. Kitchen yesterday introduced in congress a bill appropriating $50,000 for improvements to the public building in this city. It is hoped this bill will pull through. Such an event would give us one of the finest public buildings in the state.

ELECTED CASHIER.

Mr. Lee H. Battle Succeeds Mr. R. G. Vaughn at the City National.

At the meeting of the directors of the City National Bank yesterday Mr. Lee H. Battle, of Wilmington, N. C., was elected cashier to succeed Mr. R. G. Vaughn, who resigned a few weeks since.

The selection of Mr. Battle, who is now cashier of the Atlantic National Bank of Wilmington, N. C., the largest bank of North Carolina, is only in keeping with the progressive spirit of the directors of the City National Bank, who, by their sound and conservative business methods, have increased the business of this bank within the last twelve months nearly 300 per cent. It is their aim never to take a step backward and their progressive spirit is shown by their selection of one of, if not the most, successful bankers in the state.

Greensboro is to be congratulated on having such a man as Mr. Battle connected with one of her financial institutions.

With such men as Mr. J. M. Walker, president, and Mr. Lee H. Battle, cashier, we bespeak for the City National Bank continued prosperity and increase of business.

ADDRESS OF WARNING

In Regard to the Outbreak of Smallpox at Terra Cotta.

North Carolina, Guilford county.

Whereas, it has come to the knowledge of the authorities of Guilford county that there is an epidemic of smallpox at Terra Cotta Works in said county, and whereas, it is made the duty of said authorities to warn all citizens of the county and persons generally of the said epidemic and to urge upon all persons the importance of immediate vaccination in order that a scourge of that disease may be av rted,

Now therefore, we the board of county commissioners and county superintendent of health of said county most earnestly urge upon all persons the wisdom and the duty of being vaccinated at once. Should the disease spread and the people neglect this warning and request, it may become necessary for us in compliance with law, and in order to prevent a devastating epidemic of this terrible disease, to order compulsory vaccination.

All persons who are unable to pay the expenses of vaccination, will be vaccinated free by the county.

B. A. Best M D., Superintendent of Public Health.

W. C. Boren,
W. H. Ragan,
W. C. Micheal,
County Commissioners.

"My good men," said the clerical looking individual, "I trust you have taken the subject of your future welfare into consideration Do you think that you are entitled to pass within the pearly gates?" "Soitney," replied Weary Walker, promptly. "We ain't never done nuthin', hev we, Dusty?"

The Poet Burns,

Not the least of the advantages attending life assurance is the serenity of mind which attends the provident man lying on a bed of sickness, or when he is in prospect of death—so unlike that painful anxiety for the future welfare of the family not provided for. The poet Burns, in writing to a friend a few days before his death, said that he was "still the victim of affliction. Alas! Clark, I begin to fear the worst. Burns' poor widow and a half a dozen of his dear little ones, helpless orphans; there, I am weak as a woman's tear. Enough of this, 'tis half of my disease!"

"If you would escape the rock upon which the lamented Burns split;" take shelter from the storm that is bound to spend its fury upon you when the fatal summons comes, by at once securing the magnetic contract offered by the Provident Savings.

J. STERLING JONES,
Manager,

DeWitt's Little Early Risers purify the blood, clean the liver, invigorate the system. Famous little pills for constipation and liver troubles. Howard Gardner.

No, Maude, dear, we have never heard of a telescope being spoken of as a looking-glass.

Volcanic Eruptions

Are grand, but skin eruptions rob life of joy. Bucklen's Arnica Salve cures them; also old, running and fever sores, ulcers, boils, felons, corns, warts, cuts, bruises, burns, scalds, chapped hands, chilblains. best pile cure on earth Drives out pains and aches. Only 25 cents a box. Cure guaranteed. Sold by C. E. Holton, druggist.

GUARANTEED to CURE A COLD.

GARDNER'S LAXATIVE COLD CURE.

25 Cents per Box.

HOWARD GARDNER, Druggist,

Corner Opposite Postoffice

A SURE CURE FOR CROUP.

Twenty-five Years' Constant Use Without a Failure.

The first indication of croup is hoarseness, and in a child subject to that disease it may be taken as a sure sign of the approach of an attack. Following this hoarseness is a peculiar rough cough. If Chamberlain's Cough Remedy is given as soon as the child becomes hoarse, or even after the croupy cough appears 't will prevent the attack. It is used in many thousands of homes in this broad land and never disappoints the anxious mothers. We have yet to learn of a single instance in which it has not proved effectual. No other preparation can show such a record—twenty-five years' constant use without a failure. For sale by C E. Holton, druggist.

New Drafts of Samoan Treaty.

Washington, Dec. 2—The British ambassador, Lord Pauncefote, was at the state department today with Secretary Hay and went over the new drafts of the treaty for the partition of Samoa, preparatory to the final signing, which was performed at 3:30 this afternoon.

Three copies of the instrument were prepared, one for each of the Governments concerned, all the final changes suggested were agreed to, and Secretary Hay after the ceremony was over expressed himself greatly pleased at the successful consummation of the negotiations.

Son of an Ohio Merchant Cured of Chronic Diarrhoea.

My son has been troubled for years with chronic diarrhoea. Sometime ago I persuaded him to take some of Chamberlain's Colic, Cholera and Diarrhoea Remedy. After using two bottles of the 25-cent size he was cured. I give this testimonial, hoping some one similarly afflicted may read it and be benefited.—Thomas B. Bower, Glencoe, O. For sale by O. E. Holton, druggist.

Mrs. De Tanque—"Judging from the way you came home from the club this morning I should say you were intoxicated." Mr. De Tanque—"You wrong me, my dear. My club foot troubled me a little, that's all."

C. E. Holton, druggist, guarantees every bottle of Chamberlain's Cough Remedy and will refund the money to any one who is not satisfied after using two-thirds of the contents. This is the best remedy in the world for la grippe, coughs, colds, croup and whooping cough and is pleasant and safe to take. It prevents any tendency of a cold to result in pneumonia.

As the counterfeiter went about
The making of some "tin,"
Quoth he: "I hope if I'm found out
That I won't be found in."

It takes but a minute to overcome a tickling in the throat and to stop a cough by the use of One Minute Cough Cure. This remedy quickly cures all forms of throat and lung troubles. harmless and pleasant to take. It prevents consumption A famous specific for grippe and its after effects Howard Gardner.

Gaining a Wide Reputation.

As a cure for rheumatism Chamberlain's Pain Balm is gaining a wide reputation. D. B. Johnston, of Richmond, Ind., has been troubled with that ailment since 1862. In speaking of it he says: "I never found anything that would relieve me until I used Chamberlain's Pain Balm. It acts like magic with me. My foot was swollen and pained me very much, but one good application of Pain Balm relieved me. For sale by O E Holton, druggist.

A man may be considered slow when he's behind in the rent, but he's ahead of the landlord.

His Life Was Saved.

Mr. J. E. Lilly, a prominent citizen of Hannibal, Mo., lately had a wonderful deliverance from death. In telling of it he says: "I was taken with typhoid fever that ran into pneumonia. My lungs became hardened. I was so weak I couldn't even sit up in bed. Nothing helped me. I expected to soon die of consumption, when I heard of Dr. King's New Discovery. One bottle gave great relief I continued to use it and now am well and strong. I can't say too much in its praise." This marvellous medicine is the surest and quickest cure in the world for all throat and lung trouble Regular sizes 50 cents and $1.00. Trial bottles free at C. E. Holton's drug store; every bottle guaranteed.

The man with an impediment in his speech naturally hesitates to tell a lie.

Bismarck's Iron Nerve

Was the result of his splendid health. Indomitable will and tremendous energy are not found where stomach, liver, kidneys and bowels are out of order. If you want these qualities and the success they bring, use Dr. King's New Life Pills. They develop every power of brain and body. Only 25c at Holton's drug store.

The kick of a cow is not the most acceptable form of a milk punch.

No Cure—No Pay.

That is the way all druggists sell Grove's Tasteless Chill Tonic for Chills and Malaria. It is simply iron and quinine in a tasteless form. Children love it. Adults prefer it to bitter, nauseating tonics. Price. 50c.

Looks like a "green" Christmas.

Mrs. R. Churchill, Berlin, Vt., says: "Our baby was covered with running sores. DeWitt's Witch Hazel Salve cured her." A specific for piles and skin diseases. Beware of worthless counterfeits. Howard Gardner.

A weather report—thunder.

"One Minute Cough Cure is the best remedy I ever used for coughs and colds. It is unequalled for whooping cough. Children all like it," writes H. N. Williams, Gentryville, Ind. Never fails. It is the only harmless remedy that gives immediate results. ures coughs, colds, hoarseness, croup, pneumonia, bronchitis and all throat and lung troubles. Its early use prevents consumption Howard Gardner

INDIGESTION

Cured by Johnson's Dyspepsia Cure

"I suffered over two years with Indigestion and Nervous Dyspepsia, unable to eat or sleep. I tried several physicians and different remedies, but they only helped me for a short time. A friend advised me to take Johnson's Dyspepsia Cure. I have taken three boxes, and am now feeling better than I have for two years. Have a good appetite, sleep well and have gone of the symptoms of Indigestion or Dyspepsia, while I have gained ten pounds in weight within a couple of months. I am taking pleasure in recommending Johnson's Dyspepsia Cure wherever I can, and several of my friends are taking it with marked result."—L. A. Arnold, Cinn.

POLICE COURT.

E. G. Newcomb Bound Over to Court in Three Cases for Retailing.

Mayor Taylor had an interesting court yesterday evening and three defendants were sent on to the superior court.

The first defendant was Sam Gorrell colored, charged with cursing on the streets. Warrant dismissed.

E. D. Mills, white, for being drunk and disorderly, must do fifteen days on the roads.

James Perrilla and John Garrett, two colored boys, were bound over to court for stealing a two-gallon jug of whiskey from Ben Wilkerson Saturday night.

There were three cases against E. G. Newcomb for retailing and he was bound over to court in each case, his bond being fixed at $100. John N. Wilson and A. M. Scales were the prosecuting attorneys, while ex-Judge W. P. Bynum, Jr., Col John N. Staples, Maj Stedman and E. D. Steele, of High Point, appeared for the defendant. Judge John Gray Bynum is also attorney for the defendant, but he was out of town yesterday.

When the first case against Mr. Newcomb was called his attorneys asked for a continuance until Wednesday, but the prosecuting attorneys insisted on a hearing yesterday and two of the cases were heard. Defendant waived examination in the third and agreed to have it sent on to court also.

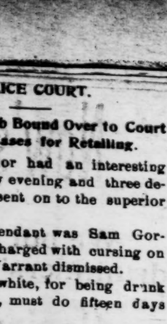
Off For Asheville.

A large number of ministers and delegates left on the 7:37 train this morning for the Baptist convention which meets at Asheville. Among those who left here were Rev L. Johnston and J F. Watson, of this city, Rev. John E White, of Raleigh, and Rev. R. H. Herring, of Wilmington R. W. Brooks and Mrs. E E. Richardson are expected to leave tomorrow.

There is to-day a crying need of a reformation in the treatment of the body. The basis of this reformation is to be found in the thesis of Dr. R.V. Pierce: "Diseases which originate in the stomach must be cured through the stomach."

In the thirty odd years of Dr. Pierce's experience as chief consulting physician to the Invalids' Hotel and Surgical Institute in Buffalo, N.Y., he has treated more than half a million people, with a record of ninety-eight cures in every hundred. The theory held by Dr. Pierce that the stomach is the chief breeding place of disease, is abundantly borne out by the success of his treatment which is addressed primarily to the stomach and other organs of digestion and nutrition.

No other medicine acts so powerfully and as perfectly on the stomach and other organs of digestion and nutrition, as Dr. Pierce's Golden Medical Discovery. Men and women afflicted with shortness of breath, heart disease, suffocation, dizziness, spots before the eyes, "liver pains," and similar ailments have been promptly and perfectly cured by the use of "Golden Medical Discovery."



Thomas A. Swarts, of Sub-Station C., Columbus, Ohio, Box 105, writes: "I was taken very sick with severe headache, then cramps in the stomach, and my food would not digest, then kidney and liver trouble, and my back got so weak I could scarcely get around. At last I had all these at once, and I gave money to the doctors whenever I thought they would do me any good, but the more I doctored the worse I got, until six years passed. I had become so poorly I could only walk in the house by the aid of a chair, and I got so thin I had *given up to die*, thinking that I could not be cured. Then I saw one of my neighbors, who said, 'Take my advice, and use Dr. Pierce's Golden Medical Discovery and make a new man out of yourself.' The first bottle helped me and after I had taken eight I was weighed and found I had gained 27 pounds. I have done more hard work in the past eleven months than I did in two years before, and I am healthy to-day and do not feel anything like dying. I cannot give Dr. Pierce's Golden Medical Discovery too much praise."

CAUSE OF THE TYPHOID.

[CONTINUED FROM FIRST PAGE]

this possible and not infrequently probable source of infection.

The Drinking Water:—The water supply was obtained from the city water works and three wells, and one at the Teague house across the street from the college, rented for a dormitory, located within ten feet of the house sewer, one at the wooden dormitory within 20 feet of one of the main sewers and one in the open space between the administration building, the brick dormitory and the dining room, about 125 feet from the leaking soil pipe and finally as far from the sewer of the main building. This well is about 40 feet in depth, 10 feet being in earth and the remaining 30 in what appeared to be solid rock. Samples from all four of these sources was sent to the State Chemist for analysis by Dr. McIver as soon as the diagnosis of typhoid fever was made, and the analyses were made on the 19th of November. The chemist pronounced those from the three wells, from the chemical point of view, good drinking water, and that from the city supply, bad, owing to the high percentage of albuminoid ammonia, though he stated that it might be due to vegetable contamination—as was doubtless the case—from falling leaves in the stream furnishing the city water. As soon as I learned that the disease was typhoid fever, I wrote President McIver, suggesting that he write Dr. Anderson, at Wilson, the bacteriologist of the board, for the section of the state including Greensboro, for steralized bottles and have a bacteriological examination of the waters made, as it was much more important than a chemical.

He did so, the bottles came, the samples were taken, packed and carried in person by Prof. Joyner to the express office and receipt taken on Friday, November 24th. On Monday morning McIver telegraphed Dr. Anderson of the result of the examination for the meeting of the board of directors that night. He replied that the water had not been received. Inquiries showed that the water had not left the express office at Greensboro. I mention this to explain the delay at which the people were growing impatient, and would add that bacteriological examinations require several days. Other bottles were immediately steralized, new samples taken and gotten off that night, the express company exerting themselves to hurry them forward.

Dr. Anderson's report has been received. It shows the water of the Teague well and of the central well near the brick dormitory to be infected with intestinal bacilli, and that of the other well and city supply to be free from harmful germs.

Explanation:—The general impression, with a reservation as to the bacteriological examination, was that the leaking soil pipe was the cause of the fever, on the theory that every time the door of the butter room was open a draft of air from the outside blew over the sewerage saturated earth through the ventilated opening in the wall carrying with it the germs and infecting the butter—and possibly other food products in the general storeroom, the door of which is 10 feet from that of the butter room and opens on a connecting passage. This condition was unsanitary in the highest degree, and sewer gas in sleeping and living rooms is undoubtedly a cause of disease, but being extremely sceptical, to say the least, as to the aerial transmission of typhoid fever I could not accept this theory though I feared I would be compelled to do so. The cause, whatever it was, was one common to all the residents in the college, either food or drink, partaken of by all, as the sickness was impartially scattered through the three widely separated dormitories. The central well was the only one used by all. Its location, 125 feet from the nearest sewer, slightly uphill, and 30 feet through solid rock made its infection seem very probable. But "solid" rock generally has cracks in it, and from somewhere, most probably, of course, in the leaking soil pipes, which may have been leaking for several years—it was put in in 1895—the sewerage traveling very slowly, perhaps, not just reaching the well this fall, bacteria found only in the intestine of man or animal have gotten into that well. Whatever nothing excludes animal[illegible] the specific germ of typ[illegible] is never present, we say to be sure, but such the same, and drinking water contaminated with human sewerage, although the bacillus typhosus may not be isolated, which is a difficult thing to do, is regarded as a sufficient cause for the disease. The objection that the outside students drank of this same water I would meet by saying that they were in the institution only five or six hours a day five days in the week, that women proverbially drink very little water—too little for their own good generally—and that small doses of the poison do not cause the disease always. Then some are more susceptible than others—hardly more than 10 per cent succumb to full doses.

Care of the sick.—I went through the infirmary and saw the arrangement and management, and I do not hesitate to say that with skilful physicians, trained nurses, good surroundings and an affectionate interest on the part of every one connected with the college, the sick could not be cared for better anywhere.

The management.—In the light of what has occured it is easy to say that those in control of the institution are to blame. I think not—any more than we all are under similar circumstances. As I understand it, the plumbing was let to responsible parties, the contract being for a "first class" job, and there seems to have been no reason to suspect the leak for a particular inquiry of the young lady who was in the butter room every day developed that she had not noticed any odor other than usually found in all basements. None of us has his well examined bacteriologically unless there is reason to suspect it. Situated as it is the contamination of the central well appeared hardly possible. If the management were deserving of criticism in the least it would surely come from the friends of the sick. With a unanimity they commend it in every respect.

It was particularly requested by the board of directors to state in this communication that they had by former resolution, expressed their approval of the action of the executive committee and their appreciation of the conduct and work during this trying ordeal of President McIver and the members of the faculty, and their entire confidence in him and them. I was also asked to say that the report of the physician to the board was entirely satisfactory. For myself I wish to say that I was more thoroughly convinced than ever of President McIver's eminent fitness for his position, and that I shared the confidence of the board in the medical attendance.

Conclusion.—The old sewer has been entirely removed, the leaking terra cotta soil pipe has been replaced with iron laid in lead joints, the contaminated earth will all be removed, and the space disinfected and refilled, the wells will all be filled up, and the city water will safely be used, probably steralized to insure its keeping safe, and every nook and corner of every building used by the students will be thoroughly disinfected with bichloride of mercury and formaldehyde gas. In short, everything that science and common sense may suggest will be done, and in my opinion residents in the State Normal and Industrial College will feel safer than ever before, and that no old student need hesitate to return or new one to enter for fear of typhoid fever. There is no reason why the great usefulness of this noble institution should be impaired.

Moral on Behalf of the Board of Health.—Every city and town should have an expert inspector of plumbing and require inspection by him of every job before it is covered up and accepted, and all public institutions and private boarding schools and other establishments with plumbing should require a similar inspection. Wells near sewers or any accumulation of filth, especially of human origin, are dangerous. Guard with jealous care the purity of your drinking water.

R. H. Lewis, M. D.,
Secretary State Board of Health.

STATEMENT BY PHYSICIANS.

The following is a statement made by the physicians that have been in attendence at the Normal:

November 28, 1899.

Gentlemen:

After a careful examination of the records, and a patient review of the history of the sickness at The State Normal and Industrial College since October 5th, we find that there have two distinct epidemics. The first, beginning about October 25th, purely malarial in character; the second, beginning in the second week of November, distinctly typhoid, though complicated in one-third of the cases with malaria.

There have been in all about one hundred cases. Of these seventy per cent were primarily malarial and sixty per cent malarial only, all recovering in from four to ten days.

Of the remaining forty per cent., ten per cent., after having had malaria, were infected by the typhoid poison, while the remaining thirty per cent seem to have had primary typhoid infection. In view of the severity of the typhoid poison, it is surprising that so small a percentage of the students were infected.

Anna M. Gove, M. D.,
W. P. Beall, M. D.,
W. J. Richardson, M. D.,
Chas. L. Scott, M. D.

RELATIVES EXPRESS GRATITUDE.

Greensboro, N. C., Nov. 29, 1899.

We, the undersigned relatives and friends of the patients who have been and are now sick at the State Normal and Industrial College, desire to express our gratitude to the college authorities for the manner in which our loved ones have been cared for.

Having been here, some of us since before the college suspended, and others for a shorter period of time, we wish to say that it seems to us that all that could be expected has been done by the authorities, faculty, physicians, and the nurses, and we are also deeply grateful to those ladies of Greensboro who have tendered and given their services as nurses of the sick:

W H Hagwood, Wake Forest
J D Davis, Grissom
Mrs C M Wiley, Winston
Mrs C M Babbitt, Newbern
Miss Eva Stafford, Burlington.
Mrs T B Bailey, Mocksville
N B Daniel, Satterwhaite
T B Bailey, Mocksville.

John G Blount, M D Washington.
G L Mardison, Thurman.
Jennie M Shaw, Rockingham.
J T Moore, Saratoga, Wilson county.
Jonas C Williams, Ines, Warren county.
E E Bouchelle, Wilkesboro.
Seth Bridgman, Washington.
Mrs A E Sides, Mt. Airy.

ONE SUSPECT

And the Board of Aldermen Had Him Carried to the Pest House.

A special meeting of the city board of aldermen was held yesterday to take steps for the protection of the city against the suspected case of smallpox at 920 East Market street.

A committee was appointed to engage a physician to examine the suspect and take charge of the case. The physician visited the suspect yesterday evening and ordered him, and all who had been exposed to be sent to the pest house.

The disease is of very mild form and sufficient quarantine regulations have been established, so there is no cause for excitement.

The house has been guarded since Saturday. The suspect is a colored man.

There are no new cases reported among the patients at Terra Cotta, four miles west of the city, and several of the sick are convalescent.

"It frequently happens," says the Manayunk philosopher, "that the wife with the sunny disposition can make things hot."

PERSONAL AND SOCIAL.

Capt. E. T. Morris is in the city today.

T. Pace, of Hidaga, was here last night.

W. B. Yelver, of Fremont, was here last night.

W. B. Stafford, of Salem, was here this morning.

C. M. Cooper, of Anderson, was at the McAdoo last night.

Prof. W. C. Separk, of Durham, was in the city last night.

J. M. Galloway, Esq., of Madison, visited Greensboro today.

Howard B. Starrett returned last night from a business trip.

Samuel Odell, of High Point, took supper in Clegg's last night.

G. Sam Bradshaw went to Asheboro this morning to attend court.

F. L. Fuller, one of Durham's substantial citizens, was here last night.

Frederick C. Cleveland, of Chapel Hill, spent last night at the McAdoo.

Ex-Judge Spencer B. Adams left this morning for a legal business trip.

Robt. J. Walker and Harry Shaw of Charlotte, spent last night at the McAdoo.

Rev. J. R. Brooks, of Reidsville, spent last night at Clegg's and went home this morning.

John R. Cobler, a former resident of Greensboro, but now of Danville, was at Clegg's last night.

A. B. Dalzgerfield, Watt Martin and G. W. Hinshaw, of Winston, were in the city last night.

Wilbur W. Jones, representative of the Raleigh Morning Post, was in the city yesterday afternoon.

R. J. Reynolds, the well known tobacco manufacturer of Winston, was in the city last night enroute to New York.

Miss Willie Smith, formerly of this city, but who now lives at Durham, passed here last night returning to Salem Female Academy from a visit to her mother.

Prof. J. L. Ludlow, the expert civil engineer who made a report to the board of directors of the Normal College last week, arrived in the city last night and is spending the day here.

Mr. Bailey, junior of L. Banks Holt's cotton mill at Graham, came in last night and his family here this morning. They arrived from the north and left at 8:10 for Graham, their future home.

18 MONTHS FOR RETAILING.

Chairman of a Board of County Commissioners Goes to Columbus.

Pensacola, Fla., Dec. 2.—In the United States court today, John M. Brownell, of Westville, chairman of the board of county commissioners and of the democratic executive committee of Holmes county, was sentenced to eighteen months in the penitentiary at Columbus, O., for retailing rum without a license.

He was convicted of this offense a few days ago, but owing to his prominence the jury brought in a recommendation for mercy, notwithstanding that it was shown he had been in the business for several years.

No Right to Ugliness.

The woman who is lovely in face, form and temper will always have friends, but one who would be attractive must keep her health. If she is weak, sickly and run down, she will be nervous and irritable. If she has constipation or kidney trouble, her impure blood will cause pimples, blotches, skin eruptions and a wretched complexion. Electric bitters is the best medicine [illegible] purify the blood, [illegible] bright eyes, smooth, velvety skin, rich complexion. It will make a good-looking charming woman of a run-down invalid. Only 50 cents at C. E. Holton's drug store.

Please make a note of the fact that there will be

No More Saw Edges

on your collars and cuffs. Saw edges have long been a bugbear to laundrymen, but at last the evil has been overcome by the invention of a machine to iron the edges as well as the surface. This is one of our latest purchases in the way of new machinery. We will have more to speak about as soon as we get our building completed.

"CAPTAIN DICK."

This Successful Play to be Presented at High Point.

"Captain Dick," Bertram and Willard's beautiful military play, which has several times delighted large audiences in Greensboro, and been successfully presented in about all of the principal towns of the State for the past two years, is to be produced in High Point at the Opera House next Thursday and Friday nights under the auspices of the Ladies Aid Society of the Methodist Church. The Telegram has so often spoken in high praise of this pretty play that it seems hardly necessary to do so again, but but for the pleasure of those in High Point who may need some endorsement of the merits of this attaction, be it said that this paper commends to them "Captain Dick" as an entertainment entirely worthy of their patronage. The ladies and gentlemen who contitute the cast need no indorsement as their talents have so often been the source of much pleasure to the people of that properous little city. The High Point Cornet Band and a specially organized Orchestra will furnish the musical features. Several parties who saw the play here have expressed a desire to go over and see it again. It is likely that quite a little party will be made up and do so.

Should be Careful.

A letter was received by a physician in this city last night from a gentleman at Goldston, complaining that several negroes who are suspected of having smallpox have just arrived there from near Pomona, and have been quarantined by the county physician. The letter says that the writer believes the negroes ran away, and expresses indignation because of the supposed carelessness of the authorities of Guilford.

Since the above complaint was received the Telegram called up Mr. Boren, chairman of the board of county commissioners, and notified him of the complaints. He says that the first patient was about well when he escaped and ran away. Two others, suspects, ran away with him and went to Goldston. Mr. Boren says as soon as he learned of this he wrote Messrs. Bynum & Paschal, also Sheriff Johnson, of Chatham to look out for them. He knows of no others gettting away All patients and suspects are closely guarded, and the authorities are trying to do their full duty in the matter.

Rev. Jordan to Leave.

Rev. P. J. Jordan, who has been pastor of Bethel A. M. E. church in this city for the past two or three years, will leave this week for Asheville to accept the pastorate of Asheville station. His family will remain in Greensboro. Rev. Jordan was recently appointed to the Asheville charge by the Western North Carolina conference of the A M. E. church at Durham. During his residence in this city Rev. Jordan has made many friends who wish him unbounded success in his new field.

BRIEF LOCAL MATTERS.

Ex-Congressman Thomas Settle is back from Asheville.

J. M. Hennrix & Co. advertise unusually interesting bargains for next Friday.

The enterprising firm of Will H. Matthews & Co. will treat you right. See change of ad in today's issue.

The football team of the University of North Carolina passed through the city at noon returning to Chapel Hill from Georgia.

R. M. Philips, editor and manag r of the Telegram, yesterday evening returned from a busines trip to Montgomery county.

This is cold weather, but the timely advertisement of Thacker & Brockmann tells you to not shiver and shake. Read it.

Mr. and Mrs. Harry Livingstone Lee, of New York, arrived this morning and are visiting Mrs. Lee's mother, Mrs. H. H. Tate.

Dr. Dred Peacock, of G. F. College, left today for Washington, N. C., to attend the North Carolina conference of the M. E Church, south, which convenes tomorrow.

Rev. Jno. C. Troy and daughter, Louise, were here today enroute to their home at Jonesboro from Charlotte and Concord, where they have been since conference at the latter place.

Misses Sallie and Mary Meade Bernard, of Petersburg, Va., who have been visiting Capt. and Mrs. Thos. Bernard, on Asheboro street, since the Bernard-Devin wedding last Wednesday, left at noon today for their home.

CUSTOMERS FROM ALL PARTS.

The Sale of High Grade Pianos at Factory Cost Goes Merrily on at 217 S. Elm St., Greensboro.

Open Evenings Until 9 O'clock.

Customers from all parts say: "It's just what we needed here—some good pianos sold within the reach of all." The sale of high grade pianos at factory cost goes merrily on at 217 S. Elm. Many are purchased each day by delighted customers who know a good thing when they see it.

The pianos offered are all bran new and direct from our factories. They are here in the Wake room, good big stock second to none in the large cities to select from. The are warranted for five to eight years, and each and every one sold will prove a "gem" to the owner or no sale.

Our sales this week, as we expected, reduced our stock considerably, but we will have another lot in early tomorrow morning., and can give our customers today some twenty elegant instruments to select from. We have only one price to all alike. No less accepted. We give you the cash price If you care for time the price is the same except we charge six per cent interest. Time is money if you care to get in on this sale and save from $100 to $300 on your piano. We offer today a lot of four very handsome mahogany and walnut, large size $450 pianos, your choice for $258, with mandolin attachment. Examine our $225 piano that agents sell—it is marked $96

If you care for the finest made you can save money by securing one of our $500 pianos for $289.

$400 pianos, perfect gems, for $226.

$425 pianos (mandolin), $258.

$225 pianos for $96.

Second hand upright, fair condition, $60.

In order to accommodate those who cannot call during the day, we will keep the store open until 9 in the evening.

C. Jellison, Factory Agent,
1t 217 S. Elm street.

Would You be Up to Date?

With the holiday season
Comes the holiday ad,
And plain is the reason
To tell of the "new fad."

If you're in the swell set
Who sit up quite late,
You must be sure to get
Things that are "up-to-date."

If you have settled down
With a nice running mate,
Be sure she will frown
If you're not "up-to-date."

Now whoever you are
You must learn soon or late
To Kaufman's to go
If you'd be "up-to-date."

All about things to buy
You will find in the late
Advertisement of Kaufmann;
He is quite "up-to-date."

The Patients Better.

The news from the State Normal and Industrial College this afternoon is that the great majority of the sick ones are very much better, though two or three of the young ladies are lingering in a critical condition.

Miss Emma Johnson, of Farmington, Davie county, who was one of the most seriously ill of the patients, has recovered sufficiently to return to her home and left at noon today.

Misses Hogwood, of Wake Forest, and Hardison, of Newbern, are convalescent and will go home tomorrow probably.

Should be Educated.

While the condition at the Greensboro Normal is bad, there are several other places in the State afflicted in a like manner. In one place as many as three in one family have fallen victims to the typhoid germs, an investigation as to the cause at Greensboro is proper, the investigations might be carried further and the cause in every case eradicated, if such a thing is possible. —Durham Herald.

We can hardly blame you for not coming in through the mud and dirt we have had, but you will make up for lost time now that our cement pavement is complete. Prices lower than ever too. Fishblate-Katz Co.

Vick's Electric Corn Salve, 10c., gives smiles for frowns.

AT THE ACADEMY TONIGHT.

The Woodward-Warren Co. Arrive—Tickets Selling Well.

The Woodward-Warren Company arrived this morning and are comfortably situated at the McAdoo House. Mr. Woodward reports a very successful season so far, and he and his wife, Miss Warren, are enjoying the best of health. The other members of the company are also feeling in the best of spirits.

The sale of tickets for tonight's performance is very large and the demand seems to increase as the time draws nearer for tonight's opening. There will doubtless be many who will be unable to gain admission, which speaks untold praise for the popularity of the Woodward-Warren Company.

Special Term of Asheville Court.

The venire for the special term of district court to be held at Asheville beginning January 9th, was sent out from United States Marshal Millikan's office today, and the jurors will be summoned at once. The special term will be held principally for the purpose of trying Lawrence Pulliam, the Asheville bank defaulter.
